1. A customer wants to create a value variable for report for the characteristics 0CAL_Quarter that shows the current quarter and would like to display the same quarter of the previous year in the report. Which is the offset value he should select to fulfill this requirement.

1) -12
2) +12
3) -4
d) +4
e) -1

2. A person wants to create a query with filters, which of the following statements regarding filters are true for him to consider while designing a query.

1) Filter values in the filter - fixed values section affects the whole query and can the overwritten via navigation the executed report.

2) A reusable filter can contain fixed values and default values.

3) Filter values in the filter - default values selection effects the whole query and can be overwritten via navigation in the executed report.

4) Filter values in the filter - fixed values section effects the whole query and can be ~~navigated~~ overwritten via navigation in the executed report.

3. A person wants to create calculated keyfigures for a query which of the following statements Infoprovider level calculated keyfigures are correct.

1) You can Include formula variables

2) You can Include basic key figures, Restricted keyfigures Calculated key figures that have been defined in the query level.

3) You must drag the calculated key figures to the Section where it should be used in your query.

4) You can Include basic key figures, Restricted keyfigures Calculated keyfigures that have been defined at the Infoprovider level.

5) When you make changes to an Infoprovider level Calculated keyfigures and effects all the queries in which it is reused.

4. A developer is trying to build a query with Structure in the query. which of the following statements regarding keyfigures structures are Correct?

1) To create a keyfigure structure, Right click on the keyfigure to open its Content and Choose Create structure

2) formulaes can only be defined with in keyfigure structure

3) You can only use key figure structure in a query

4) Each component of a keyfigure structure must Contain a characterstic object. Keyfigure object

5. A person wants to make display attribute available as a navigational attribute in the query. what are the steps he needs to perform?

1. Activate the navigational attributes in the characteristics Properties in the BW Query designer.
2. Drag and drop the display attribute to the tree Section of the Query designer.
3. Activate the navigation attribute in Sap BW data from transformation
4. Change the attribute type from display to navigation in the Infoobject maintainance.
5. Activate the navigation attribute in the respective Infoprovider.

6. While creating a query in query designer which one of the following are percentage function that are available as an operator in BW Query designer?

1. Percentage share of result
2. Percentage share of overall result
3. Percentage share of report result.
4. Percentage share of Infoprovider result.

7. A person is applying formula in query which one of these values does a boolean operator deliver in a BW Query formula when it is true.

1. 0
2. 1
3. True
4. False

8. customer would like to filter how the

can be processed while creating a query. select the Correct option

1. Manual Entry
2. Replacement path
3. Authorization
4. Customer Exit.

SapExit

9. A designer would like to a query on Bw on hand differs from sap Bw running on other data base in which of the following ways?

1) Query Performance is Increased
2) Query performance decreases
3) Number of data persistency layers Increases.
4) flexible connection of Bw data modules with sap hana native data Model.
5) Activation time for data store object data decreases.

10. You use the keyfigures Revenue amount in the Columns section of the Bw Query and related to the months of January, Feb and March 2003. how many Columns will be displayed in report.

1. One column with revenue amount for Jan, feb, March 2003.
2. Two columns, one for revenue Amount - ~~Jan-2003~~ and one for calendar Month Jan, feb and March 2003
3. Three Column, one for revenue Amount - Jan-2003, one for Revenue amount - feb-2003 and one for revenue amount - March 2003.
